CEQA Initial Study - Environmental Checklist Form (Based on the State CEQA Guidelines, Appendix G Rev. 10/04)

1. Project Numbers/Environmental Log Number/Title:

TPM 20991, Log No. 06-14-002; Brayton Way-Law TPM

- Lead agency name and address:
 County of San Diego, Department of Planning and Land Use 5201 Ruffin Road, Suite B, San Diego, CA 92123-1666
- 3. a. Contact: Jarrett Ramaiya, Environmental Planner II
 - b. Phone number: (858) 694-3015
 - c. E-mail: Jarrett.Ramaiya@sdcounty.ca.gov.
- 4. Project location:

The proposed project is located at 1471 Brayton Way near the intersection of Chase Avenue in the Valle de Oro Community Planning area of an unincorporated area of the County of San Diego, APN 498-320-19.

Thomas Brothers Coordinates: Page 1272, Grid A/2

5. Project sponsor's name and address:

Snipes-Dye Associates Bill Snipes 8348 Center Drive, Suite G La Mesa, CA 91942

6. General Plan Designation

Community Plan: Valle de Oro
Land Use Designation: 3 (Residential)
Density: 2 du/1 acre

7. Zoning

Use Regulation: RR2 (Rural Residential)

Density: 1 du/.5 acre

Special Area Regulation: None

8. Description of project:

The proposed project is a minor residential subdivision within the Valle de Oro Community Planning area. The project proposes to divide 3.49 acres into 4 parcels and a remainder with a minimum lot size of 0.5 acre net. Two existing single-family residences are located on the current parcel and one will be upon proposed Parcel 3 and the other will be located upon the proposed remainder parcel. The project is subject to the Regional Land Use Element 1.1 (CUDA) Current Urban Development Area and General Plan Use Designation (3) Residential, which permits 2 dwelling units per acre. The current zone for the property is RR2 (Rural Residential), which requires that a minimum lot size of .5 net acre be maintained. Water extension pipelines will be required and will be served by Otay Water District. Sewer pipelines will be extended by approximately 1,200 feet and will be served by the Otay Water District and under the jurisdiction of Sweetwater Authority. A left turn lane will be implemented on Chase Avenue for eastbound drivers to access Brayton Way.

9. Surrounding land uses and setting:

The project site is located on relatively flat terrain with elevations ranging from 550 feet to 585 feet. The property contains no sensitive habitat as it has been previously developed in the past. The surrounding land uses consist of single-family residential homes with lots averaging 1.5 acres to the west, 2.07 acres to the north, 0.66 acres to the south and 0.97 acres to the east. Brayton Way is directly west and Chase Avenue is directly south.

10. Other public agencies whose approval is required (e.g., permits, financing approval, or participation agreement):

Permit Type/Action	<u>Agency</u>	
Fontativa Dargal Man	County	

Tentative Parcel Map County of San Diego

County Right-of-Way Permits County of San Diego

Construction Permit

Excavation Permit Encroachment

Permit

Grading Permit County of San Diego

Water District Approval Otay Water District Sewer District Approval Otay Sewer District

Fire District Approval San Miguel Consolidated Fire

Protection District

ENVIRONMENTAL FACTORS POTENTIALLY AFFECTED: The environmental

factors checked below would be potentially affected by this project and involve at least one impact that is a "Potentially Significant Impact" or a "Potentially Significant Impact Unless Mitigation Incorporated," as indicated by the checklist on the following pages.				
□ <u>A</u>	<u>esthetics</u>	Agriculture Resour	rces Air Quality	
□ <u>B</u>	iological Resources	✓ Cultural Resources	s Geology & Soils	
□ <u>H</u>	azards & Haz. Materials	Hydrology & Wate	r Quality

	ERMINATION: (To be cone basis of this initial evaluation)		Agency)	
		ct COULD NOT have	nent of Planning and Land Use finds a significant effect on the ON will be prepared.	
\checkmark	On the basis of this Initial Study, the Department of Planning and Land Use finds that although the proposed project could have a significant effect on the environment, there will not be a significant effect in this case because revisions in the project have been made by or agreed to by the project proponent. A MITIGATED NEGATIVE DECLARATION will be prepared.			
On the basis of this Initial Study, the Department of Planning and Land Use finds that the proposed project MAY have a significant effect on the environment, and an ENVIRONMENTAL IMPACT REPORT is required.

INSTRUCTIONS ON EVALUATION OF ENVIRONMENTAL IMPACTS

- 1. A brief explanation is required for all answers except "No Impact" answers that are adequately supported by the information sources a lead agency cites in the parentheses following each question. A "No Impact" answer is adequately supported if the referenced information sources show that the impact simply does not apply to projects like the one involved (e.g., the project falls outside a fault rupture zone). A "No Impact" answer should be explained where it is based on project-specific factors as well as general standards (e.g., the project will not expose sensitive receptors to pollutants, based on a project-specific screening analysis).
- 2. All answers must take account of the whole action involved, including off-site as well as on-site, cumulative as well as project-level, indirect as well as direct, and construction as well as operational impacts.
- 3. Once the lead agency has determined that a particular physical impact may occur, then the checklist answers must indicate whether the impact is potentially significant, potentially significant unless mitigation incorporated, or less than significant. "Potentially Significant Impact" is appropriate if there is substantial evidence that an effect may be significant. If there are one or more "Potentially Significant Impact" entries when the determination is made, an EIR is required.
- 4. "Potential Significant Unless Mitigation Incorporated" applies where the incorporation of mitigation measures has reduced an effect from "Potentially Significant Impact" to a "Less Than Significant Impact." The lead agency must describe the mitigation measures, and briefly explain how they reduce the effect to a less than significant level.
- 5. Earlier analyses may be used where, pursuant to the tiering, program EIR, or other CEQA process, an effect has been adequately analyzed in an earlier EIR or negative declaration. Section 15063(c)(3)(D). In this case, a brief discussion should identify the following:
 - Earlier Analysis Used. Identify and state where they are available for review.
 - b) Impacts Adequately Addressed. Identify which effects from the above checklist were within the scope of and adequately analyzed in an earlier document pursuant to applicable legal standards, and state whether such effects were addressed by mitigation measures based on the earlier analysis.
 - c) Mitigation Measures. For effects that are "Potentially Significant Unless Mitigation Incorporated," describe the mitigation measures that were incorporated or refined from the earlier document and the extent to which they address site-specific conditions for the project.
- 6. Lead agencies are encouraged to incorporate into the checklist references to information sources for potential impacts (e.g., general plans, zoning ordinances). Reference to a previously prepared or outside document should, where appropriate, include a reference to the page or pages where the statement is substantiated.
- 7. The explanation of each issue should identify:
 - a) The significance criteria or threshold, if any, used to evaluate each question; and
 - b) The mitigation measure identified, if any, to reduce the impact to less than significance

	Initial Study 0991, Log No. 06-14-002	- 5 -	March 15, 2007
	THETICS Would the project: Have a substantial adverse effect	on a scenic	vista?
	Potentially Significant Impact Potentially Significant Unless Mitigation Incorporated		Less than Significant Impact No Impact
Discuss	sion/Explanation:		
valued highwa Jarrett from a project Official visible	viewsheds, including areas desig ys or County designated visual re Ramaiya on January 25, 2006, th scenic vista and will not change the site is located approximately 3.5 scenic Highway but is not visible	nated as off sources. Be proposed ne composit miles east of from the proposed to the proposite of the propos	ased on a site visit completed by project is not located near or visible ion of an existing scenic vista. The f State Route 125 which is an
,	Substantially damage scenic reso outcroppings, and historic building		ding, but not limited to, trees, rock tate scenic highway?
	Potentially Significant Impact Potentially Significant Unless Mitigation Incorporated		Less than Significant Impact No Impact

No Impact: State scenic highways refer to those highways that are officially designated. A scenic highway is officially designated as a State scenic highway when the local jurisdiction adopts a scenic corridor protection program, applies to the California Department of Transportation for scenic highway approval, and receives notification from Caltrans that the highway has been designated as an official Scenic Highway. Based on a site visit completed by Jarrett Ramaiya on January 25, 2006, the proposed project is not located near or visible within the same composite viewshed as a State scenic highway and will not change the visual composition of an existing scenic resource within a State scenic highway. Generally, the area defined within a State scenic highway is the land adjacent to and visible from the vehicular right-of-way. The dimension of a scenic highway is usually identified using a motorist's line of vision, but a reasonable boundary is selected when the view extends to the distant horizon. The project site is located approximately 3.5 miles east of State Route 125 which is an Official Scenic Highway but is not visible from the project site, nor is the project site visible from Highway 125. Therefore, the proposed project will not have any substantial adverse effect on a scenic resource within a State scenic highway.

Mitigation Incorporated

c) Substantially degrade the existing visual character or quality of the site and its surroundings?			
	Potentially Significant Impact	$\overline{\checkmark}$	Less than Significant Impact
	Potentially Significant Unless Mitigation Incorporated		No Impact
Discus	ssion/Explanation:		
visible the pa discus viewe and ex	Than Significant Impact: Visual character landscape within a viewshed. Visual character elements line, form, color, and textures and terms of dominance, scale, divers r's perception of the visual environment at expectation of the viewers. The existing vind surrounding can be characterized as so	aracte ire. V ity and nd va sual c	r is based on the organization of isual character is commonly dontinuity. Visual quality is the ries based on exposure, sensitivity haracter and quality of the project
reside visual subdiv reside miles	roposed project is Tentative Parcel Map fential subdivision. The project is compatible character and quality for the following receivision is similar to the surrounding develogential viewshed. The nearest Scenic High to the west and is not visible from the prohighway 125.	ole wit asons pment way is	th the existing visual environment's the proposed minor residential and existing single-family Highway 125, approximately 3.5
The project will not result in cumulative impacts on visual character or quality because the entire existing viewshed and a list of past, present and future projects within that viewshed were evaluated. Refer to XVII. Mandatory Findings of Significance for a comprehensive list of the projects considered. Those projects listed in Section XVII are located within the viewshed surrounding the project and will not contribute to a cumulative impact for the following reasons: similar lot sizes within surrounding area, single-family residential within project vicinity, and similar bulk and scale of the proposed residence in conjunction with the surrounding residences. Therefore, the project will not result in any adverse project or cumulative level effect on visual character or quality on-site or in the surrounding area.			
d)	Create a new source of substantial light day or nighttime views in the area?	or gla	re, which would adversely affect
	Potentially Significant Impact	$\overline{\checkmark}$	Less than Significant Impact
	Potentially Significant Unless		No Impact

Less Than Significant Impact: The project proposes a minor residential subdivision, which may include outdoor lighting. Any future outdoor lighting pursuant to this project shall be required to meet the requirements of the County of San Diego Zoning Ordinance (Section 6322-6326) and the Light Pollution Code (Section 59.101-59.115).

The project will not contribute to significant cumulative impacts on day or nighttime views because the project will conform to the Light Pollution Code. The Code was developed by the San Diego County Department of Planning and Land Use and Department of Public Works in cooperation with lighting engineers, astronomers, land use planners from San Diego Gas and Electric, Palomar and Mount Laguna observatories, and local community planning and sponsor groups to effectively address and minimize the impact of new sources light pollution on nighttime views. The standards in the Code are the result of this collaborative effort and establish an acceptable level for new lighting. Compliance with the Code is required prior to issuance of any building permit for any project. Mandatory compliance for all new building permits ensures that this project in combination with all past, present and future projects will not contribute to a cumulatively considerable impact. Therefore, compliance with the Code ensures that the project will not create a significant new source of substantial light or glare, which would adversely affect daytime or nighttime views in the area, on a project or cumulative level

<u>II. AGRICULTURE RESOURCES</u> -- In determining whether impacts to agricultural resources are significant environmental effects, lead agencies may refer to the California Agricultural Land Evaluation and Site Assessment Model (1997) prepared by the California Department of Conservation as an optional model to use in assessing impacts on agriculture and farmland. Would the project:

,	Convert Prime Farmland, Unique Farmlamportance Farmland), as shown on the Farmland Mapping and Monitoring Prog to non-agricultural use?	maps	s prepared pursuant to the
	Potentially Significant Impact Potentially Significant Unless Mitigation Incorporated		Less than Significant Impact No Impact

Discussion/Explanation:

No Impact: The project site does not contain any lands designated as Prime Farmland, Unique Farmland, or Farmland of Statewide Importance as shown on the maps prepared pursuant to the Farmland Mapping and Monitoring Program of the California Resources Agency. In addition, the project does not contain Farmland of Local Importance. Therefore, no Prime Farmland, Unique Farmland, Farmland of Statewide or Farmland of Local Importance will be converted to a non-agricultural use.

	nitial Study 1991, Log No. 06-14-002	- 8 -	March 15, 2007
b) (Conflict with existing zoning for agri	cultural us	e, or a Williamson Act contract?

applical	QUALITY Where available, the ole air quality management or air pone following determinations. Would	ollution co	ntrol district may be relied upon to
,	Conflict with or obstruct implementa Strategy (RAQS) or applicable porti		,
	Potentially Significant Impact Potentially Significant Unless Mitigation Incorporated		Less than Significant Impact No Impact
Discuss	sion/Explanation:		

Less Than Significant Impact: The project proposes development that was anticipated in SANDAG growth projections used in development of the RAQS and SIP. Operation of the project will not result in emissions of significant quantities of criteria

pollutants listed in the California Ambient Air Quality Standards or toxic air contaminants as identified by the California Air Resources Board. As such, the proposed project is not expected to conflict with either the RAQS or the SIP. In addition, the project is consistent the SANDAG growth projections used in the RAQS and SIP, therefore, the project will not contribute to a cumulatively considerable impact.

- 9 -

,	Violate any air quality standard or contr projected air quality violation?	ibute s	substantially to an existing or
	Potentially Significant Impact Potentially Significant Unless Mitigation Incorporated		Less than Significant Impact No Impact

Discussion/Explanation:

In general, air quality impacts from land use projects are the result of emissions from motor vehicles, and from short-term construction activities associated with such projects. The San Diego County Air Pollution Control District (SDAPCD) has established screening-level criteria for all new source review (NSR) in APCD Rule 20.2. For CEQA purposes, these screening-level criteria can be used as numeric methods to demonstrate that a project's total emissions (e.g. stationary and fugitive emissions, as well as emissions from mobile sources) would not result in a significant impact to air quality. Since APCD does not have screening-level criteria for emissions of volatile organic compounds (VOCs), the use of the screening level for reactive organic compounds (ROC) from the CEQA Air Quality Handbook for the South Coast Air Basin (SCAB), which has stricter standards for emissions of ROCs/VOCs than San Diego's, is appropriate. However, the eastern portions of the county have atmospheric conditions that are characteristic of the Southeast Desert Air Basin (SEDAB). SEDAB is not classified as an extreme non-attainment area for ozone and therefore has a less restrictive screening-level. Projects located in the eastern portions of the County can use the SEDAB screening-level threshold for VOCs.

Less Than Significant Impact: The project proposes a 4-lot and a remainder parcel residential subdivision. However, grading operations associated with the construction of the project would be subject to County of San Diego Grading Ordinance, which requires the implementation of dust control measures. Emissions from the construction phase would be minimal and localized, resulting in pollutant emissions below the screening-level criteria established by SDAPCD Rule 20.2 and by the South Coast Air Quality Management District (SCAQMD) CEQA Air Quality Handbook section 6.2 and 6.3. In addition, the vehicle trips generated from the project will result in an additional 30 Average Daily Trips (ADTs). According to the Bay Area Air Quality Management District CEQA Guidelines for Assessing the Air Quality Impacts of Projects and Plans, projects that generate less than 2,000 ADT are below the Screening-Level Criteria established by SDAPCD Rule 20.2 and by the SCAQMD CEQA Air Quality Handbook section 6.2 and 6.3 for criteria pollutants. As such, the project will not violate any air quality standard or contribute substantially to an existing or projected air quality violation.

,	Result in a cumulatively considerable newhich the project region is non-attainme ambient air quality standard (including requantitative thresholds for ozone precure	nt unc	ler an applicable federal or state
;		eleasir	ng emissions which exceed
	Potentially Significant Impact Potentially Significant Unless Mitigation Incorporated		Less than Significant Impact No Impact

San Diego County is presently in non-attainment for the 1-hour concentrations under the California Ambient Air Quality Standard (CAAQS) for Ozone (O₃). San Diego County is also presently in non-attainment for the annual geometric mean and for the 24-hour concentrations of Particulate Matter less than or equal to 10 microns (PM₁₀) under the CAAQS. O₃ is formed when volatile organic compounds (VOCs) and nitrogen oxides (NO_x) react in the presence of sunlight. VOC sources include any source that burns fuels (e.g., gasoline, natural gas, wood, oil); solvents; petroleum processing and storage; and pesticides. Sources of PM₁₀ in both urban and rural areas include: motor vehicles, wood burning stoves and fireplaces, dust from construction, landfills, agriculture, wildfires, brush/waste burning, and industrial sources of windblown dust from open lands.

Less Than Significant Impact: Air quality emissions associated with the project include emissions of PM₁₀, NO_x and VOCs from construction/grading activities, and VOCs as the result of increase of traffic from operations at the facility. However, grading operations associated with the construction of the project would be subject to County of San Diego Grading Ordinance, which requires the implementation of dust control measures. Emissions from the construction phase would be minimal and localized, resulting in PM₁₀ and VOC emissions below the screening-level criteria established by SDAPCD Rule 20.2 and by the South Coast Air Quality Management District (SCAQMD) CEQA air quality handbook section 6.2 and 6.3. The vehicle trips generated from the project will result in an additional 30 Average Daily Trips (ADTs). According to the Bay Area Air Quality Management District CEQA Guidelines for Assessing the Air Quality Impacts of Projects and Plans, projects that generate less than 2,000 ADT are below the Screening-Level Criteria established by SDAPCD Rule 20.2 and by the SCAQMD CEQA air quality handbook section 6.2 and 6.3 for VOCs and PM₁₀.

In addition, a list of past, present and future projects within the surrounding area were evaluated and none of these projects emit significant amounts of criteria pollutants. Refer to XVII. Mandatory Findings of Significance for a comprehensive list of the projects considered. The proposed project as well as the past, present and future projects within the surrounding area, have emissions below the screening-level criteria established by SDAPCD Rule 20.2 and by the SCAQMD CEQA air quality handbook section 6.2 and 6.3, therefore, the construction and operational emissions associated

with the proposed project are not expected to create a cumulatively considerable impact nor a considerable net increase of PM10, or any O_3 precursors.

d)	Expose sensitive receptors to substantia	al pollu	utant concentrations?
	Potentially Significant Impact Potentially Significant Unless Mitigation Incorporated		Less than Significant Impact No Impact
Discu	ssion/Explanation:		
Grade house	ality regulators typically define sensitive (e), hospitals, resident care facilities, or date individuals with health conditions that we quality.	y-care	e centers, or other facilities that may
within polluta private specia activit signifi cumul conce emiss	Than Significant Impact: The following a quarter-mile (the radius determined by ants is typically significant) of the propose e elementary school. However, based or alist, Mario Covic, on January 26, 2006, the ies that would result in exposure of these cant pollutant concentrations. In additional latively considerable exposure of sensitive entrations because the proposed project a considerable with the screening-level criteria estance.	the Sed project the sed project identification in the project is sed to the sed of the s	CAQMD in which the dilution of ject: Kindercare Learning Center by by the DPLU staff air quality oject does not propose uses or ified sensitive receptors to project will not contribute to a eptors to substantial pollutant as the listed projects have need by SDAPCD Rule 20.2 and by
e)	Create objectionable odors affecting a s	ubsta	ntial number of people?
	Potentially Significant Impact Potentially Significant Unless Mitigation Incorporated		Less than Significant Impact No Impact

Discussion/Explanation:

Less Than Significant Impact: The project could produce objectionable odors, which would result from volatile organic compounds, ammonia, carbon dioxide, hydrogen sulfide, methane, alcohols, aldehydes, amines, carbonyls, esters, disulfides dust and endotoxins from the construction and operational phases. However, these substances, if present at all, would only be in trace amounts (less that 1 $\mu g/m^3$). Subsequently, no significant air quality – odor impacts are expected to affect surrounding receptors. Moreover, the affects of objectionable odors are localized to the immediate surrounding area and will not contribute to a cumulatively considerable odor. A list of past, present and future projects within the surrounding area were evaluated and none of these

projects create objectionable odors. Refer to XVII. Mandatory Findings of Significance for a comprehensive list of the projects considered.

IV. BIOLOGICAL RESOURCES Would the project:			
a) Have a substantial adverse effect, either directly or through habitat modifications, on any species identified as a candidate, sensitive, or special status species in local or regional plans, policies, or regulations, or by the California Department of Fish and Game or U.S. Fish and Wildlife Service?			
	Potentially Significant Impact		Less than Significant Impact
	Potentially Significant Unless Mitigation Incorporated	$\overline{\checkmark}$	No Impact
Discus	sion/Explanation:		
No Impact: Based on an analysis of the County's Geographic Information System (GIS) records, the County's Comprehensive Matrix of Sensitive Species, site photos, and a site visit by Jarrett Ramaiya on January 25, 2006, it has been determined that the site has been completely disturbed and contains no native vegetation or habitats. Therefore, no species identified as a candidate, sensitive, or special status species in local or regional plans, policies, or regulations, or by the California Department of Fish and Game or U.S. Fish and Wildlife Service would be expected to occur on-site.			
,	Have a substantial adverse effect on any natural community identified in local or rethe California Department of Fish and Ga	egiona	al plans, policies, regulations or by
	Potentially Significant Impact		Less than Significant Impact
	Potentially Significant Unless Mitigation Incorporated	$\overline{\checkmark}$	No Impact

Discussion/Explanation:

No Impact: County staff, Jarrett Ramaiya has conducted a site visit on January 25, 2006, and determined that the proposed project site does not contain any riparian habitats or other sensitive natural communities as defined by the County of San Diego Multiple Species Conservation Program, County of San Diego Resource Protection Ordinance, Natural Community Conservation Plan, Fish and Game Code, Endangered Species Act, Clean Water Act, or any other local or regional plans, policies or regulations. In addition, no riparian or otherwise sensitive habitat has been identified within or adjacent to the area proposed for off-site impacts resulting from road improvements, utility extensions, etc. Therefore, the project is not expected to have direct or indirect impacts from development on any riparian habitat or other sensitive natural community.

c

Have a substantial adverse effect on federally protected wetlands as defined by

Section 404 of the Clean Water Act (including, but not limited to, marsh, vernal pool, coastal, etc.) through direct removal, filling, hydrological interruption, or other means?			
	Potentially Significant Impact		Less than Significant Impact
	Potentially Significant Unless Mitigation Incorporated	$\overline{\checkmark}$	No Impact
Discus	sion/Explanation:		
No Impact: County staff, Jarrett Ramaiya has conducted a site visit on January 25, 2006, and determined that the proposed project site does not contain any wetlands as defined by Section 404 of the Clean Water Act, including, but not limited to, marsh, vernal pool, stream, lake, river or water of the U.S., that could potentially be impacted through direct removal, filling, hydrological interruption, diversion or obstruction by the proposed development. Therefore, no impacts will occur to wetlands defined by Section 404 of the Clean Water Act in which the Army Corps of Engineers maintains jurisdiction over.			
d) Interfere substantially with the movement of any native resident or migratory fish or wildlife species or with established native resident or migratory wildlife corridors, or impede the use of native wildlife nursery sites?			
	Potentially Significant Impact		Less than Significant Impact
	Potentially Significant Unless Mitigation Incorporated	$\overline{\checkmark}$	No Impact
Dia anna ian / Tumban atian			

Discussion/Explanation:

No Impact: Based on an analysis of the County's Geographic Information System (GIS) records, the County's Comprehensive Matrix of Sensitive Species, site photos, and a site visit by Jarrett Ramaiya on January 25, 2006, staff has determined that the site has been completely disturbed and contains no native vegetation or habitats. Therefore, impedance of the movement of any native resident or migratory fish or wildlife species, or established native resident or migratory wildlife corridors, or impedance of the use of native wildlife nursery sites would not be expected as a result of the proposed project.

e) Conflict with the provisions of any adopted Habitat Conservation Plan, Natural Communities Conservation Plan, other approved local, regional or state habitat conservation plan or any other local policies or ordinances that protect biological resources?

	Initial Study 1991, Log No. 06-14-002	- 14 -	March 15, 2007	
	Potentially Significant Impact Potentially Significant Unless Mitigation Incorporated	\square	Less than Significant Impact No Impact	
Discuss	sion/Explanation:			
dated J Conser- regiona Special protect (MSCP)	Less Than Significant Impact: Refer to the attached Ordinance Compliance Checklist dated January 26, 2007, for further information on consistency with any adopted Habitat Conservation Plan, Natural Communities Conservation Plan, other approved local, regional or state habitat conservation plan, including, Habitat Management Plans (HMP) Special Area Management Plans (SAMP) or any other local policies or ordinances that protect biological resources including the Multiple Species Conservation Program (MSCP), Biological Mitigation Ordinance, Resource Protection Ordinance (RPO), Habitat Loss Permit (HLP).			
a) (TURAL RESOURCES Would Cause a substantial adverse char as defined in 15064.5?		gnificance of a historical resource	
	Potentially Significant Impact Potentially Significant Unless Mitigation Incorporated		Less than Significant Impact No Impact	

Less Than Significant Impact: Based on an analysis of records and a survey of the property by County of San Diego staff archaeologist, Gail Wright on February 9, 2006, it has been determined that there are one or more historical resources within the project site. These resources include two existing single-family potentially historic homes are located on the project parcel (over 50 years old). A cultural resources report titled, "Cultural Resources Survey Report for: TPM 20991, Log No. 06-14-002 - Brayton Way/Law Minor Subdivision, APN 4983201900; Negative Survey", dated February 9, 2006, and prepared by Gail Wright evaluated the significance of the historical resources based on a review of historical records including 1928 photographs, aerial GIS photographs, maps, and building records. The parcel was surveyed in part because of two significant historic buildings nearby. The Brayton House, a Victorian farm house is located two parcels to the north on Brayton Way and the John Carmichael house, an architecturally significant bungalow is several houses to the north on Brayton Way on the opposite side of the street. Based on the results of this study, it has been determined that the historic resources are not significant pursuant to the State of California Environmental Quality Act (CEQA) Guidelines, Section 15064.5. Moreover, if the resources are not considered significant historic resources pursuant to CEQA Section 15064.5 loss of these resources cannot contribute to a potentially significant cumulative impact.

No Impact: Unique Paleontological Resources - A review of the paleontological maps provided by the San Diego Museum of Natural History indicates that the project is located entirely on plutonic igneous rock and has no potential for producing fossil remains.

Unique Geologic Features – The site does not contain any unique geologic features that have been catalogued within the Conservation Element (Part X) of the County's General Plan or support any known geologic characteristics that have the potential to support unique geologic features. Additionally, based on a site visit by Gail Wright on February 9, 2006, no known unique geologic features were identified on the property or in the immediate vicinity.

No Impact: Based on an analysis of records and a survey of the property by County of San Diego staff archaeologist, Gail Wright on February 9, 2006, it has been determined that the project will not disturb any human remains because the project site does not include a formal cemetery or any archaeological resources that might contain interred human remains. The results of the survey are provided in an archaeological survey report titled, "Cultural Resources Survey Report for: TPM 20991, Log No. 06-14-002 – Brayton Way/Law Minor Subdivision, APN 4983201900; Negative Survey", dated February 9, 2006, and prepared by Gail Wright. The site is extensively disturbed, and has a very low potential for additional cultural resources.

VI. GEOLOGY AND SOILS -- Would the project:

- a) Expose people or structures to potential substantial adverse effects, including the risk of loss, injury, or death involving:
 - i. Rupture of a known earthquake fault, as delineated on the most recent Alquist-Priolo Earthquake Fault Zoning Map issued by the State Geologist for the area or based on other substantial evidence of a known fault? Refer to Division of Mines and Geology Special Publication 42.

□ Potentially Significant Impact
 □ Less than Significant Impact
 □ Potentially Significant Unless Mitigation Incorporated
 □ No Impact

Discussion/Explanation:

No Impact: The project is not located in a fault rupture hazard zone identified by the Alquist-Priolo Earthquake Fault Zoning Act, Special Publication 42, Revised 1997, Fault-Rupture Hazards Zones in California. Therefore, there will be no impact from the exposure of people or structures to adverse effects from a known hazard zone as a result of this project.

i	i. Strong seismic ground shaking?		
	Potentially Significant Impact		Less than Significant Impact
	Potentially Significant Unless Mitigation Incorporated	\checkmark	No Impact

No Impact: The Uniform Building Code (UBC) and the California Building Code (CBC) classifies all San Diego County with the highest seismic zone criteria, Zone 4. However, the project is not located within 5 kilometers of the centerline of a known active-fault zone as defined within the Uniform Building Code's Maps of Known Active Fault Near-Source Zones in California. In addition, the project will have to conform to the Seismic Requirements -- Chapter 16 Section 162- *Earthquake Design* as outlined within the California Building Code. Section 162 requires a soils compaction report with proposed foundation recommendations to be approved by a County Structural Engineer before the issuance of a building or grading permit. Therefore, there will be no impact from the exposure of people or structures to potential adverse effects from strong seismic ground shaking as a result of this project.

iii. Seismic-related ground failure, including liquefaction?			
Potentially Significant Impact Potentially Significant Unles Mitigation Incorporated		Less than Significant Impact No Impact	
Discussion/Explanation:			
No Impact: The geology of the project site is identified as Cretaceous Plutonic. This geologic environment is not susceptible to ground failure from seismic activity. In addition, the site is not underlain by poor artificial fill or located within a floodplain. Therefore, there will be no impact from the exposure of people to adverse effects from a known area susceptible to ground failure.			
iv. Landslides?			
Potentially Significant Impact Potentially Significant Unles Mitigation Incorporated		Less than Significant Impact No Impact	

Discussion/Explanation:

No Impact: The site is not located within a landslide susceptibility zone. Also, staff has determined that the geologic environment of the project area has a low probability to be located within an area of potential or pre-existing conditions that could become unstable in the event of seismic activity.

CEQA Initial	Study	
TPM 20991,	Log No.	06-14-002

- 18 - March 15, 2007

b)	Result in substantial soil erosion or the I	oss of	topsoil?
	Potentially Significant Impact Potentially Significant Unless Mitigation Incorporated		Less than Significant Impact No Impact

Discussion/Explanation:

Less Than Significant Impact: According to the Soil Survey of San Diego County, the soils on-site are identified as Placentia Sandy Loam (PfC) and Vista Coarse Sandy Loam (VsD) that has a soil erodibility rating of "severe" as indicated by the Soil Survey for the San Diego Area, prepared by the US Department of Agriculture, Soil Conservation and Forest Service dated December 1973. However, the project will not result in substantial soil erosion or the loss of topsoil for the following reasons:

- The project will not result in unprotected erodible soils; will not alter existing drainage patterns; is not located in a floodplain, wetland, or significant drainage feature; and will not develop steep slopes.
- The project has prepared a Stormwater Management Plan dated September 7, 2006, prepared by Snipes-Dye Associates. The plan includes the following Best Management Practices to ensure sediment does not erode from the project site: silt fencing, fiber rolls, street sweeping and vacuuming, stockpile management, solid waste management, stabilized construction entrance/exit, gravel bag berm, sandbag barrier, material delivery and storage, spill prevention and control, concrete waste management, water conservation practices, and paving and grinding operations, and any minor slopes created incidental to construction and not subject to a major or minor grading permit shall be protected by covering with plastic or tarp prior to a rain event, and shall not have vegetative cover reestablished within 180 days of completion of the slope and prior to final building approval.
- The project involves grading. However, the project is required to comply with the San Diego County Code of Regulations, Title 8, Zoning and Land Use Regulations, Division 7, Sections 87.414 (DRAINAGE - EROSION PREVENTION) and 87.417 (PLANTING). Compliance with these regulations minimizes the potential for water and wind erosion.

Due to these factors, it has been found that the project will not result in substantial soil erosion or the loss of topsoil on a project level.

In addition, the project will not contribute to a cumulatively considerable impact because all the of past, present and future projects included on the list of projects that involve grading or land disturbance are required to follow the requirements of the San Diego County Code of Regulations, Title 8, Zoning and Land Use Regulations, Division 7, Sections 87.414 (DRAINAGE - EROSION PREVENTION) and 87.417 (PLANTING); Order 2001-01 (NPDES No. CAS 0108758), adopted by the San Diego Region RWQCB

on February 21, 2001; County Watershed Protection, Storm Water Management, and Discharge Control Ordinance (WPO) (Ord. No. 9424); and County Storm water Standards Manual adopted on February 20, 2002, and amended January 10, 2003 (Ordinance No. 9426). Refer to XVII. Mandatory Findings of Significance for a comprehensive list of the projects considered.

d) Be located on expansive soil, as defined in Table 18-1-B of the Uniform Building Code (1994), creating substantial risks to life or property?			
	Potentially Significant Impact Potentially Significant Unless Mitigation Incorporated		Less than Significant Impact No Impact

Discussion/Explanation:

Less Than Significant Impact: The project is located on expansive soils as defined within Table 18-I-B of the Uniform Building Code (1994). This was confirmed by staff review of the Soil Survey for the San Diego Area, prepared by the US Department of Agriculture, Soil Conservation and Forest Service dated December 1973. The soils onsite are Placentia Sandy Loam (PfC) and Vista Coarse Sandy Loam (VsD). However the project will not have any significant impacts because the project is required to comply the improvement requirements identified in the 1997 Uniform Building Code, Division III – Design Standard for Design of Slab-On-Ground Foundations to Resist the Effects of Expansive Soils and Compressible Soils, which ensure suitable structure safety in areas with expansive soils. Therefore, these soils will not create substantial risks to life or property.

Discuss	sion/Explanation:		
N.a. Issass	est. The proposed project is not less	حلدانيين لمصد	in a Campushanaiya Land Llaa

No Impact: The proposed project is not located within a Comprehensive Land Use Plan (CLUP) for airports; or within two miles of a public airport. Also, the project does not propose construction of any structure equal to or greater than 150 feet in height, constituting a safety hazard to aircraft and/or operations from an airport or heliport. Therefore, the project will not constitute a safety hazard for people residing or working in the project area.

The following sections summarize the project's consistency with applicable emergency response plans or emergency evacuation plans.

No Impact

OPERATIONAL AREA EMERGENCY PLAN:

Mitigation Incorporated

Less Than Significant Impact: The Operational Area Emergency Plan is a framework document that provides direction to local jurisdictions to develop specific operational area of San Diego County. It provides guidance for emergency planning and requires subsequent plans to be established by each jurisdiction that has responsibilities in a disaster situation. The project will not interfere with this plan because it will not prohibit subsequent plans from being established.

ii. SAN DIEGO COUNTY NUCLEAR POWER STATION EMERGENCY RESPONSE PLAN

No Impact: The San Diego County Nuclear Power Station Emergency Response Plan will not be interfered with by the project due to the location of the project, plant and the specific requirements of the plan. The emergency plan for the San Onofre Nuclear Generating Station includes an emergency planning zone within a 10-mile radius. All land area within 10 miles of the plant is not within the jurisdiction of the unincorporated County and as such a project in the unincorporated area is not expected to interfere with any response or evacuation.

iii. OIL SPILL CONTINGENCY ELEMENT

No Impact: The Oil Spill Contingency Element will not be interfered with because the project is not located along the coastal zone or coastline.

iv. EMERGENCY WATER CONTINGENCIES ANNEX AND ENERGY SHORTAGE RESPONSE PLAN

No Impact: The Emergency Water Contingencies Annex and Energy Shortage Response Plan will not be interfered with because the project does not propose altering major water or energy supply infrastructure, such as the California Aqueduct.

v. DAM EVACUATION PLAN

No Impact: The Dam Evacuation Plan will not be interfered with because the project is located outside a dam inundation zone.

·	Expose people or structures to a signific wildland fires, including where wildlands where residences are intermixed with wi	are a	djacent to urbanized areas or
	Potentially Significant Impact Potentially Significant Unless Mitigation Incorporated		Less than Significant Impact No Impact

Discussion/Explanation:

No Impact: The proposed project is completely surrounded by urbanized areas, and/or irrigated lands and there are no adjacent wildland areas. Also, a Fire Service Availability Letter and conditions, dated November 30, 2005, have been received from the San Miguel Consolidated Fire Protection District. The conditions from the San Miguel Consolidated Fire Protection District include: 100 feet of clearing will be around all structures, proposed 24 foot access to new lots to be striped and posted "No parking Fire Lane to satisfaction of the District, all new residences to have residential fire sprinklers designed and installed to NFPA 13D standards, a means of turning around emergency vehicles on site is required, a new hydrant capable of delivering a minimum of 1500 gallons per minute with 20 pounds per square inch of residual pressure is required at the corner of the subject property and Brayton Way, a 100-foot flammable vegetation modification zone is required, road surface may be AC up to 15% gradegrades from 16-20% require PCC and grades in excess of 20% are not accepted. Therefore, based on the location of the project; review of the project by County staff; and through compliance with the San Miguel Consolidated Fire Protection District's conditions, it is not anticipated that the project will expose people or structures to a significant risk of loss, injury or death involving hazardous wildland fires.

	Potentially Significant Impact	$\overline{\checkmark}$	Less than Significant Impact
	Potentially Significant Unless Mitigation Incorporated		No Impact

Less Than Significant Impact: The project lies in the 909.22 hydrologic subarea, within the Sweetwater hydrologic unit. According to the Clean Water Act Section 303(d) list, July 2003, although portions of the San Diego Bay are impaired for coliform bacteria, no portion of the Sweetwater River, which is tributary to the Bay, is impaired. Constituents of concern in the Sweetwater River watershed include coliform bacteria and trace metals.

The project proposes the following activities that are associated with these pollutants: soil disturbing activities that will result in exposed soil areas including minor trenching and grading, asphalt paving including patching, solid wastes from PCC demolition and removal, wall construction or form work, stockpiling (soil, compost, asphalt concrete, solid waste) for over 24 hours, temporary on-site storage of construction materials including mortar mix, raw landscaping and soil stabilization materials, treated lumbar, rebar, and plated metal fencing materials, and there might be trash generated from the project. However, the following site design measures and/or source control BMPs and/or treatment control BMPs will be employed such that potential pollutants will be reduced in any runoff to the maximum extent practicable so as not to increase the level of these pollutants in receiving waters: silt fencing, fiber rolls, street sweeping and vacuuming, stockpile management, solid waste management, stabilized construction entrance/exit, gravel bag berm, sandbag barrier, material delivery and storage, spill prevention and control, concrete waste management, water conservation practices, and paving and grinding operations, and any minor slopes created incidental to construction and not subject to a major or minor grading permit shall be protected by covering with plastic or tarp prior to a rain event, and shall not have vegetative cover reestablished within 180 days of completion of the slope and prior to final building approval.

The proposed BMPs are consistent with regional surface water and storm water planning and permitting process that has been established to improve the overall water quality in County watersheds. As a result the project will not contribute to a cumulative impact to an already impaired water body, as listed on the Clean Water Act Section 303(d). Regional surface water and storm water permitting regulation for County of San Diego, Incorporated Cities of San Diego County, and San Diego Unified Port District includes the following: Order 2001-01 (NPDES No. CAS 0108758), adopted by the San Diego Region RWQCB on February 21, 2001; County Watershed Protection, Storm Water Management, and Discharge Control Ordinance (WPO) (Ord. No. 9424); County Storm water Standards Manual adopted on February 20, 2002, and amended January 10, 2003 (Ordinance No. 9426). The stated purposes of these ordinances are to protect the health, safety and general welfare of the County of San Diego residents; to protect water resources and to improve water quality; to cause the use of management practices by the County and its citizens that will reduce the adverse effects of polluted runoff discharges on waters of the state; to secure benefits from the use of storm water as a resource; and to ensure the County is compliant with applicable state and federal laws. Ordinance No. 9424 (WPO) has discharge prohibitions, and requirements that vary depending on type of land use activity and location in the

County. Ordinance No. 9426 is Appendix A of Ordinance No. 9424 (WPO) and sets out in more detail, by project category, what Dischargers must do to comply with the Ordinance and to receive permits for projects and activities that are subject to the Ordinance. Collectively, these regulations establish standards for projects to follow which intend to improve water quality from headwaters to the deltas of each watershed in the County. Each project subject to WPO is required to prepare a Storm water Management Plan that details a project's pollutant discharge contribution to a given watershed and propose BMPs or design measures to mitigate any impacts that may occur in the watershed.

,	Could the proposed project cause or co surface or groundwater receiving water peneficial uses?	
	Potentially Significant Impact Potentially Significant Unless Mitigation Incorporated	Less than Significant Impact No Impact

Discussion/Explanation:

Less Than Significant Impact: The Regional Water Quality Control Board has designated water quality objectives for waters of the San Diego Region as outlined in Chapter 3 of the Water Quality Control Plan (Plan). The water quality objectives are necessary to protect the existing and potential beneficial uses of each hydrologic unit as described in Chapter 2 of the Plan.

The project lies in the 909.22 hydrologic subarea, within the Sweetwater hydrologic unit that has the following existing and potential beneficial uses for inland surface waters, coastal waters, reservoirs and lakes, and ground water: municipal and domestic supply; agricultural supply; industrial process supply, industrial service supply; contact water recreation; non-contact water recreation; warm freshwater habitat; cold freshwater habitat; wildlife habitat; preservation of biological habitats of special significance; and rare, threatened, or endangered species habitat.

The project proposes the following potential sources of polluted runoff: soil disturbing activities that will result in exposed soil areas including minor trenching and grading, asphalt paving including patching, solid wastes from PCC demolition and removal, wall construction or form work, stockpiling (soil, compost, asphalt concrete, solid waste) for over 24 hours, temporary on-site storage of construction materials including mortar mix, raw landscaping and soil stabilization materials, treated lumbar, rebar, and plated metal fencing materials, and there might be trash generated from the project. However, the following site design measures and/or source control BMPs and/or treatment control BMPs will be employed to reduce potential pollutants in runoff to the maximum extent practicable, such that the proposed project will not cause or contribute to an exceedance of applicable surface or groundwater receiving water quality objectives or degradation of beneficial uses: silt fencing, fiber rolls, street sweeping and vacuuming,

stockpile management, solid waste management, stabilized construction entrance/exit, gravel bag berm, sandbag barrier, material delivery and storage, spill prevention and control, concrete waste management, water conservation practices, and paving and grinding operations, and any minor slopes created incidental to construction and not subject to a major or minor grading permit shall be protected by covering with plastic or tarp prior to a rain event, and shall not have vegetative cover reestablished within 180 days of completion of the slope and prior to final building approval.

In addition, the proposed BMPs are consistent with regional surface water, storm water and groundwater planning and permitting process that has been established to improve the overall water quality in County watersheds. As a result, the project will not contribute to a cumulatively considerable exceedance of applicable surface or groundwater receiving water quality objectives or degradation of beneficial uses. Refer to Section VIII., Hydrology and Water Quality, Question b, for more information on regional surface water and storm water planning and permitting process.

,	Substantially deplete groundwater sugroundwater recharge such that there a lowering of the local groundwater ta existing nearby wells would drop to a uses or planned uses for which permi	would be would be would be would be would be worst.	be a net deficit in aquifer volume or l (e.g., the production rate of pre- nich would not support existing land
	Potentially Significant Impact		Less than Significant Impact
	Potentially Significant Unless Mitigation Incorporated	$\overline{\checkmark}$	No Impact

Discussion/Explanation:

No Impact: The project will obtain its water supply from the Otay Water District that obtains water from surface reservoirs or other imported water source. The project will not use any groundwater for any purpose, including irrigation, domestic or commercial demands. In addition, the project does not involve operations that would interfere substantially with groundwater recharge including, but not limited to the following: the project does not involve regional diversion of water to another groundwater basin; or diversion or channelization of a stream course or waterway with impervious layers, such as concrete lining or culverts, for substantial distances (e.g. ¼ mile). These activities and operations can substantially affect rates of groundwater recharge. Therefore, no impact to groundwater resources is anticipated.

e) Substantially alter the existing drainage pattern of the site or area, including through the alteration of the course of a stream or river, in a manner which would result in substantial erosion or siltation on- or off-site?

CEQA Initial	Study	
TPM 20991,	Log No.	06-14-002

- 28 -

March 15, 2007

Potentially Significant Impact	\checkmark	Less than Significant Impact
Potentially Significant Unless Mitigation Incorporated		No Impact

Discussion/Explanation:

Less Than Significant Impact: The proposed project will not substantially alter the existing drainage pattern of the site or area, including through the alteration of the course of a stream or river, or substantially increase the rate or amount of surface runoff in a manner which would result in substantial erosion or siltation on- or off-site. In addition, DPW has reviewed and accepted the CEQA preliminary drainage/hydrology study received April 24, 2006 by DPLU. The project proposes a 4-lot and a remainder parcel residential subdivision. As outlined in the Storm water Management Plan (SWMP) submitted September 7, 2006, and prepared by Snipes-Dye Associates, the project will implement the following site design measures, source control, and/or treatment control BMPs to reduce potential pollutants, including sediment from erosion or siltation, to the maximum extent practicable from entering storm water runoff: silt fencing, fiber rolls, street sweeping and vacuuming, stockpile management, solid waste management, stabilized construction entrance/exit, gravel bag berm, sandbag barrier, material delivery and storage, spill prevention and control, concrete waste management, water conservation practices, and paving and grinding operations. These measures will control erosion and sedimentation and satisfy waste discharge requirements as required by the Land-Use Planning for New Development and Redevelopment Component of the San Diego Municipal Permit (SDRWQCB Order No. 2001-01), as implemented by the San Diego County Jurisdictional Urban Runoff Management Program (JURMP) and Standard Urban Storm Water Mitigation Plan (SUSMP). The SWMP specifies and describes the implementation process of all BMPs that will address equipment operation and materials management, prevent the erosion process from occurring, and prevent sedimentation in any onsite and downstream drainage swales. The Department of Public Works will ensure that the Plan is implemented as proposed. Due to these factors, it has been found that the project will not result in significantly increased erosion or sedimentation potential and will not alter any drainage patterns of the site or area onor off-site. In addition, because erosion and sedimentation will be controlled within the boundaries of the project, the project will not contribute to a cumulatively considerable impact. For further information on soil erosion refer to VI., Geology and Soils, Question b.

f) Substantially alter the existing drainage pattern of the site or area, including through the alteration of the course of a stream or river, or substantially increase the rate or amount of surface runoff in a manner which would result in flooding on- or off-site?

	Initial Study 0991, Log No. 06-14-002	- 29 -	March 15, 2007		
	Potentially Significant Impact Potentially Significant Unless Mitigation Incorporated		Less than Significant Impact No Impact		
Discus	sion/Explanation:				
Less Than Significant Impact: The proposed project will not significantly alter established drainage patterns or significantly increase the amount of runoff for the following reasons, based on a Drainage Study prepared by Snipes-Dye Associates on April 24, 2006:					
	The proposed project will not signi significantly increase the amount of CEQA Preliminary Drainage/Hydrowhich was reviewed and accepted	of runoff for ology Study	the following reasons (based on a		
	Drainage will be conveyed to eithe drainage facilities, through enginee alter established drainage patterns surface in watercourses and not si	ering standa and not sig	ards, in order to not significantly gnificantly increase the water		
	Therefore, the project will not substantially alter the existing drainage pattern of the site or area, including through the alteration of the course of a stream or river, or substantially increase the rate or amount of surface runoff in a manner which would result in flooding on- or off-site. Moreover, the project will not contribute to a cumulatively considerable alteration or a drainage pattern or increase in the rate or amount of runoff, because the project will substantially increase water surface elevation or runoff exiting the site, as detailed above.				
.	Create or contribute runoff water w planned storm water drainage syst		exceed the capacity of existing or		
	Potentially Significant Impact Potentially Significant Unless Mitigation Incorporated		Less than Significant Impact No Impact		
Discus	sion/Explanation:				

Less Than Significant Impact: The proposed project will not substantially create or contribute runoff water which would exceed the capacity of existing or planned storm water drainage systems. In addition, DPW has reviewed and accepted the CEQA Preliminary Drainage/Hydrology Study received April 24, 2006 by DPLU.

,	rance Rate Ma	area as mapped on a federal Flood ap or other flood hazard delineation
Potentially Significant Impact		Less than Significant Impact
Potentially Significant Unless Mitigation Incorporated		No Impact
Discussion/Explanation:		

No Impact: No FEMA mapped floodplains, County-mapped floodplains or drainages with a watershed greater than 25 acres were identified on the project site or off-site improvement locations; therefore, no impact will occur. The project is not within any of the above areas, boundaries or maps. In addition, DPW has reviewed and accepted the CEQA Preliminary Drainage/Hydrology Study received April 24, 2006 by DPLU.

ii.

TSUNAMI

No Impact: The project site is located more than a mile from the coast; therefore, in the event of a tsunami, would not be inundated.

iii. MUDFLOW

No Impact: Mudflow is type of landslide. The site is not located within a landslide susceptibility zone. Also, staff has determined that the geologic environment of the project area has a low probability to be located within an area of potential or pre-existing conditions that could become unstable in the event of seismic activity. In addition, though the project does propose land disturbance that will expose unprotected soils, the project is not located downstream from unprotected, exposed soils within a landslide susceptibility zone. Therefore, it is not anticipated that the project will expose people or property to inundation due to a mudflow.

IX. LAND USE AND PLANNING Would the project:					
a) Physically divide an established community?					
	Potentially Significant Impact Potentially Significant Unless Mitigation Incorporated		Less than Significant Impact No Impact		
Discuss	sion/Explanation:				
No Impact: The project does not propose the introducing new infrastructure such major roadways or water supply systems, or utilities to the area. Therefore, the proposed project will not significantly disrupt or divide the established community.					
j F	Conflict with any applicable land use pla urisdiction over the project (including, but blan, local coastal program, or zoning or avoiding or mitigating an environmental of	ut not dinan	limited to the general plan, specific ce) adopted for the purpose of		
	Potentially Significant Impact Potentially Significant Unless Mitigation Incorporated		Less than Significant Impact No Impact		

Discussion/Explanation:

Less Than Significant Impact: The proposed project is subject to the Regional Land Use Element Policy 1.1 (CUDA) Current Urban Development Area and General Plan Land Use Designation 3 (Residential). The General Plan requires minimum gross parcel sizes of 0.5 acres and not more than 2 dwelling units per acre. The proposed project has gross parcel sizes and density that are consistent with the General Plan. The project is subject to the policies of the Valle de Oro Community Plan. The proposed project is consistent with the policies of the Valle de Oro Community Plan

which include encourages medium density development only in areas where necessary public services and facilities are easily provided and surrounding land uses are compatible. Further, the proposed project is in the Current Urban Development Area which is preferred by the Valle de Oro Community Plan for parcel sizes of less than one acre. The current zone is RR2 (Rural Residential), which requires a net minimum lot size of 0.5 acres. The proposed project is consistent with the Zoning Ordinance requirements for minimum lot size.

X. MINERAL RESOURCES Would the project:				
Result in the loss of availability of a known mineral resource that would be of value to the region and the residents of the state?				
	Potentially Significant Impact Potentially Significant Unless Mitigation Incorporated		Less than Significant Impact No Impact	
Discus	sion/Explanation:			
Less Than Significant Impact: Although the project site has been classified by the California Department of Conservation – Division of Mines and Geology (Update of Mineral Land Classification: Aggregate Materials in the Western San Diego Production-Consumption Region, 1997) as an area of undetermined mineral resources MRZ-3, staff has reviewed the site's geologic environment and has determined that the site is not located within an alluvial river valley or underlain by coastal marine/non-marine granular deposits. Therefore, no potentially significant loss of availability of a known mineral resource of value to the region and the residents of the state will occur as a result of this project. Moreover, if the resources are not considered significant mineral deposits, loss of these resources cannot contribute to a potentially significant cumulative impact.				
,	Result in the loss of availability of a local site delineated on a local general plan, s		•	
	Potentially Significant Impact Potentially Significant Unless Mitigation Incorporated		Less than Significant Impact No Impact	

Discussion/Explanation:

No Impact: The project site is zoned RR2 (Rural Residential), which is not considered to be an Extractive Use Zone (S82) nor does it have an Impact Sensitive Land Use Designation (24) with an Extractive Land Use Overlay (25) (County Land Use Element, 2000).

XI. NOISE -- Would the project result in:

,	Exposure of persons to or generat established in the local general pla of other agencies?	
	Potentially Significant Impact	Less than Significant Impact
V	Potentially Significant Unless Mitigation Incorporated	No Impact

Discussion/Explanation:

Potentially Significant Unless Mitigation Incorporated: The project is residential subdivision of four and a remainder parcel and is known as the Law - Brayton Way project. Based on a site visit completed by Investigative Science and Engineering, Inc. (ISE) on March 21, 2006, and as described in the Noise Analysis prepared by ISE and dated September 6, 2006, the surrounding area supports RR2 and is occupied by rural residential use. With the recommended mitigation measures implemented, the project will not expose people to potentially significant noise levels that exceed the allowable limits of the County of San Diego General Plan, County of San Diego Noise Ordinance, and other applicable standards for the following reasons:

General Plan – Noise Element

The County of San Diego General Plan, Noise Element, Policy 4b addresses noise sensitive areas and requires an acoustical study to be prepared for any use that may expose noise sensitive area to noise in excess of a Community Noise Equivalent Level (CNEL) of 60 decibels (dBA). Moreover, if the project is excess of CNEL 60 dB(A), modifications must be made to project to reduce noise levels. Noise sensitive areas include residences, hospitals, schools, libraries or similar facilities where quiet is an important attribute. Based on the Acoustical Site Assessment report dated September 6, 2006, future traffic noise impacts are projected to exceed the County's 60 dBA CNEL sound level limit at Lots 1, 2 & 3. Future traffic noise impacts will be as high as 68.0 dBA CNEL at Lot 1. The recommended sound wall will range from 1-12 feet in height. The sound wall recommendation will be located along the southern property line that continues with a slight bend ending along the eastern property line. For sound wall details and location refer to Page 12, Section: "Future Traffic Noise Impacts" & Figure 6 in the Acoustical Site Assessment report by ISE. Noise impacts at Lot 1 will be reduced to 59.0 dBA CNEL, with the implementation of the recommended sound wall. Therefore, the project will not expose people to potentially significant noise levels that exceed the allowable limits of the County of San Diego General Plan, Noise Element.

Staff concludes that a Noise Protection Easement would also be required for Lots 1, 2 & 3 to address the interior requirements of the Noise Element prior to the issuance of building permits. The Easement would anticipate the addition of a second floor addition by future residents or any realignment of the future Jamacha Road/State Highway 54 expansion.

Noise Ordinance – Section 36-404

Based on a Noise Analysis prepared by ISE and dated September 6, 2006 non-transportation noise generated by the project is not expected to exceed the standards of the County of San Diego Noise Ordinance (Section 36-404) at or beyond the project's property line. The project site and surrounding area is zoned RR2 that has a one-hour average sound limit of 45 dBA. The Noise Analysis state's the project's noise levels at the adjoining properties will not exceed County Noise Standards.

Noise Ordinance – Section 36-410

Based on a Noise Analysis prepared by ISE and dated September 6, 2006, the project will not generate construction noise that may exceed the standards of the County of San Diego Noise Ordinance (Section 36-410). Construction operations will occur only during permitted hours of operation pursuant to Section 36-410. Also, It is not anticipated that the project will operate construction equipment in excess of an average sound level of 75 dB between the hours of 7:00 AM and 7:00 PM.

Finally, the project's conformance to the County of San Diego General Plan (Noise Element, Policy 4b) and County of San Diego Noise Ordinance (Section 36-404 and 36.410) ensures the project will not create cumulatively considerable noise impacts, because the project will not exceed the local noise standards for noise sensitive areas; and the project will not exceed the applicable noise level limits at the property line or construction noise limits, derived from State regulation to address human health and quality of life concerns. Therefore, the project will not contribute to a cumulatively considerable exposure of persons or generation of noise levels in excess of standards established in the local general plan, noise ordinance, and applicable standards of other agencies.

0)	Exposure of persons to or generation of groundborne noise levels?	of exce	ssive groundborne vibration or
	Potentially Significant Impact Potentially Significant Unless Mitigation Incorporated		Less than Significant Impact No Impact

Discussion/Explanation:

Less Than Significant Impact: The project proposes a residential subdivision of four and a remainder parcel where low ambient vibration is essential for interior operation and/or sleeping conditions. However, the facilities are typically setback more than 50 feet from any County Circulation Element (CE) roadway using rubber-tired vehicles with projected groundborne noise or vibration contours of 38 VdB or less; any property line for parcels zoned industrial or extractive use; or any permitted extractive uses. A setback of 50 feet from the roadway centerline for heavy-duty truck activities would insure that these proposed uses or operations do not have any chance of being impacted significantly by groundborne vibration or groundborne noise levels (Harris, Miller Miller and Hanson Inc., *Transit Noise and Vibration Impact Assessment* 1995,

Rudy Hendriks, *Transportation Related Earthborne Vibrations* 2002). This setback insures that this project site will not be affected by any future projects that may support sources of groundborne vibration or groundborne noise related to the adjacent roadways.

Also, the project does not propose any major, new or expanded infrastructure such as mass transit, highways or major roadways or intensive extractive industry that could generate excessive groundborne vibration or groundborne noise levels and impact vibration sensitive uses in the surrounding area.

Therefore, the project will not expose persons to or generate excessive groundborne vibration or groundborne noise levels on a project or cumulative level.

,	A substantial permanent increase in am above levels existing without the project	noise levels in the project vicinity
	Potentially Significant Impact Potentially Significant Unless Mitigation Incorporated	Less than Significant Impact No Impact

Discussion/Explanation:

Less Than Significant Impact: The project involves the following permanent noise sources that may increase the ambient noise level: Vehicle traffic noise from Brayton Way, Chase Avenue & Jamacha Road. As indicated in the response listed under Section XI Noise, Question a., the project would not expose existing or planned noise sensitive areas in the vicinity to a substantial permanent increase in noise levels that exceed the allowable limits of the County of San Diego General Plan, County of San Diego Noise Ordinance, and other applicable local, State, and Federal noise control. Also, the project is not expected to expose existing or planned noise sensitive areas to noise 10 dB CNEL over existing ambient noise levels based on a Noise Analysis prepared by ISE dated September 6, 2006. Studies completed by the Organization of Industry Standards (ISO 362; ISO 1996 1-3; ISO 3095; and ISO 3740-3747) state an increase of 10 dB is perceived as twice as loud and is perceived as a significant increase in the ambient noise level.

The project will not result in cumulatively noise impacts because a list of past, present and future projects within in the vicinity were evaluated. It was determined that the project in combination with a list of past, present and future project would not expose existing or planned noise sensitive areas to noise 10 dB CNEL over existing ambient noise levels. Refer to XVII. Mandatory Findings of Significance for a comprehensive list of the projects considered.

d) A substantial temporary or periodic increase in ambient noise levels in the project vicinity above levels existing without the project?

	nitial Study 991, Log No. 06-14-002	- 37 -	March 15, 2007
	Potentially Significant Impact Potentially Significant Unless Mitigation Incorporated		Less than Significant Impact No Impact
Discuss	ion/Explanation:		
substan including that invo	tial temporary or periodic increase g but not limited to extractive indu	es in ambie stry; outdoo ding, or bla	sting of raw materials; truck depots,
Also, general construction noise is not expected to exceed the construction noise limits of the County of San Diego Noise Ordinance (Section 36-410), which are derived from State regulations to address human health and quality of life concerns. Construction operations will occur only during permitted hours of operation pursuant to Section 36-410. Also, it is not anticipated that the project will operate construction equipment in excess of 75 dB for more than an 8 hours during a 24-hour period. Therefore, the project would not result in a substantial temporary or periodic increase in existing ambient noise levels in the project vicinity.			
n tł	or a project located within an airp ot been adopted, within two miles ne project expose people residing oise levels?	of a public	airport or public use airport, would

,	or a project within the vicinity of a eople residing or working in the p	•	• • • • • • • • • • • • • • • • • • • •
	Potentially Significant Impact Potentially Significant Unless Mitigation Incorporated		Less than Significant Impact No Impact

Discussion/Explanation:

No Impact: The proposed project is not located within a one-mile vicinity of a private airstrip; therefore, the project will not expose people residing or working in the project area to excessive airport-related noise levels.

XII. PC	PULATION AND HOUSING Would the	ne pro	oject:
a) Induce substantial population growth in an area, either directly (for example, by proposing new homes and businesses) or indirectly (for example, through extension of roads or other infrastructure)?			
	Potentially Significant Impact Potentially Significant Unless Mitigation Incorporated		Less than Significant Impact No Impact
Discuss	sion/Explanation:		
No Impact: The proposed project will not induce substantial population growth in an area because the project does not propose any physical or regulatory change that would remove a restriction to or encourage population growth in an area including, but limited to the following: new or extended infrastructure or public facilities; new commercial or industrial facilities; large-scale residential development; accelerated conversion of homes to commercial or multi-family use; or regulatory changes including General Plan amendments, specific plan amendments, zone reclassifications, sewer or water annexations; or LAFCO annexation actions.			
b) Displace substantial numbers of existing housing, necessitating the construction of replacement housing elsewhere?			
	Potentially Significant Impact Potentially Significant Unless Mitigation Incorporated		Less than Significant Impact No Impact

Discussion/Explanation:

Less Than Significant Impact: The property currently has two single-family residences, which are to remain. This residential development would not displace any amount of existing housing. Potentially a total of five single-family dwellings will exist when the lots are developed.

Displace substantial numbers of people, necessitating the construction of c) replacement housing elsewhere?

CEQA Initial Study TPM 20991, Log No. 06-14-002	- 39 -	March 15, 2007
Potentially Significant Impact Potentially Significant Unless Mitigation Incorporated		Less than Significant Impact No Impact
Discussion/Explanation:		
Less Than Significant Impact: The property currently has two single-family residences, which are to remain. This residential development would not displace any amount of existing housing. Potentially a total of five single-family dwellings will exist when the lots are developed. Therefore, the proposed project will not displace a substantial number of people. KIII. PUBLIC SERVICES Would the project result in substantial adverse physical impacts associated with		
the provision of new or physically physically altered governmental fa	altered gove acilities, the o s, in order to r ance service i	ernmental facilities, need for new or construction of which could cause maintain acceptable service ratios, ratios, response times or other
i. Fire protection?ii. Police protection?iii. Schools?iv. Parks?v. Other public facilities?		
☐ Potentially Significant Impact ☐ Potentially Significant Unless Mitigation Incorporated		Less than Significant Impact No Impact
Discussion/Explanation:		

No Impact: Based on the service availability forms received for the project, the proposed project will not result in the need for significantly altered services or facilities. Service availability forms have been provided which indicate existing services are available to the project from the following agencies/districts: Otay Water District, San Miguel Consolidated Fire Protection District, Grossmont Union High School District, Cajon Valley Union School District and the Hillsdale Middle School. The project does not involve the construction of new or physically altered governmental facilities including but not limited to fire protection facilities, sheriff facilities, schools, or parks in order to maintain acceptable service ratios, response times or other performance service ratios or objectives for any public services. Therefore, the project will not have an adverse physical effect on the environment because the project does not require new or significantly altered services or facilities to be constructed.

March 15, 2007

XIV. RECREATION

, (Nould the project increase the use of e or other recreational facilities such that facility would occur or be accelerated?	_	• • • • • • • • • • • • • • • • • • • •
	Potentially Significant Impact Potentially Significant Unless Mitigation Incorporated		Less than Significant Impact No Impact

Discussion/Explanation:

Less Than Significant Impact: The project involves a residential subdivision that will increase the use of existing neighborhood and regional parks or other recreational facilities. To avoid substantial physical deterioration of local recreation facilities the project will be required to pay fees or dedicate land for local parks to the County pursuant to the Park Land Dedication Ordinance (PLDO). The Park Land Dedication Ordinance (PLDO) is the mechanism that enables the funding or dedication of local parkland in the County. The PLDO establishes several methods by which developers may satisfy their park requirements. Options include the payment of park fees, the dedication of a public park, the provision of private recreational facilities, or a combination of these methods. PLDO funds must be used for the acquisition, planning, and development of local parkland and recreation facilities. Local parks are intended to serve the recreational needs of the communities in which they are located. The proposed project opted to pay the park fee's. Therefore, the project meets the requirements set forth by the PLDO for adequate parkland dedication and thereby reducing impacts, including cumulative impacts to local recreational facilities. The project will not result in significant cumulative impacts, because all past, present and future residential projects are required to comply with the requirements of PLDO. Refer to XVII. Mandatory Findings of Significance for a comprehensive list of the projects considered.

There is an existing surplus of County Regional Parks. Currently, there is over 21,765 acres of regional parkland owned by the County, which far exceeds the General Plan standard of 15 acres per 1,000 population. In addition, there are over one million acres of publicly owned land in San Diego County dedicated to parks or open space including Federal lands, State Parks, special districts, and regional river parks. Due to the extensive surplus of existing publicly owned lands that can be used for recreation the project will not result in substantial physical deterioration of regional recreational facilities or accelerate the deterioration of regional parkland. Moreover, the project will not result any cumulatively considerable deterioration or accelerated deterioration of regional recreation facilities because even with all past, present and future residential projects a significant surplus of regional recreational facilities will remain.

b) Does the project include recreational facilities or require the construction or expansion of recreational facilities, which might have an adverse physical effect on the environment?

CEQA Initial Study TPM 20991, Log No. 06-14-002	- 41 -	March 15, 2007	
☐ Potentially Significant Impact ☐ Potentially Significant Unless Mitigation Incorporated		Less than Significant Impact No Impact	
Discussion/Explanation:			
No Impact: The project does not include recreational facilities or require the construction or expansion of recreational facilities. Therefore, the construction or expansion of recreational facilities cannot have an adverse physical effect on the environment. XV. TRANSPORTATION/TRAFFIC Would the project: a) Cause an increase in traffic which is substantial in relation to the existing traffic load and capacity of the street system (i.e., result in a substantial increase in either the number of vehicle trips, the volume to capacity ratio on roads, or			
congestion at intersections)?			
Potentially Significant Impact	\square	Less than Significant Impact	
Potentially Significant Unless Mitigation Incorporated	Ц	No Impact	
Discussion/Explanation:			
Lana Than Oliveridia and a Na aliment insura	-4- Th		

Less Than Significant: No direct impacts. The proposed project will result in an additional 30 ADT which (per SANDAG traffic rates 3 units times 10 ADT per unit = 30 ADT. The project was reviewed by DPW and was determined not to result in a substantial increase in the number of vehicle trips, volume of capacity ratio on roads, or congestion at intersections in relation to existing conditions for the following reasons: Currently there is approximately 14000 ADT on Chase Avenue. The existing level of service on Chase Avenue is "E". The level of service with the project will be "E". Thirty (30) ADT is not a substantial increase. Given the County's traffic thresholds of 200 ADT on a road operating at LOS E and 100 ADT on a road operating at LOS F, there would be no direct impacts to a road segment. Using SANDAG's estimate for AM and PM peak hour trips the project would generate less than five peak hour trips and will not exceed the five additional trips to a critical move threshold - especially when the trips are distributed on the road network. Therefore, the project will not have a significant direct project impact on traffic volume, which is considered substantial in relation to existing traffic load and capacity of the street system.

b) Exceed, either individually or cumulatively, a level of service standard established by the County congestion management agency and/or as identified by the County of San Diego Transportation Impact Fee Program for designated roads or highways?

Discussion/Explanation:

No Impact: The proposed project is located outside of an Airport Master Plan Zone and is not adjacent to any public or private airports; therefore, the project will not result in a change in air traffic patterns.

d)	Substantially increase hazards due to dangerous intersections) or incompati	_	` • •
[Potentially Significant Impact Potentially Significant Unless Mitigation Incorporated		Less than Significant Impact No Impact
Disc	ussion/Explanation:		
Less Than Significant: There are no significant impacts to traffic safety since adequate sight distance will be required along Chase Avenue looking in both directions from the project access road. All road improvements will be constructed according to the County of San Diego Public and Private Road Standards. Roads used to access the proposed project site are up to County standards. The proposed project will not place incompatible uses (e.g., farm equipment) on existing roadways. In addition, the proposed project will provide a 10-foot-wide left turn lane for left turning movements from Chase Avenue to the private road (Brayton Way). This will also require restriping. The existing striping needs to be removed by sand blasting. The use of black paint will not be allowed when the new striping is installed. Therefore, the proposed project will not significantly increase hazards due to design features or incompatible uses.			
e)	Result in inadequate emergency acce	ess?	
[Potentially Significant Impact Potentially Significant Unless	☑	Less than Significant Impact No Impact

Discussion/Explanation:

Mitigation Incorporated

Less Than Significant: The proposed project will not result in inadequate emergency access. The San Miguel Consolidated Fire Department has reviewed the proposed project and associated emergency access roadways and has determined that there is adequate emergency fire access proposed. Additionally, roads used will be required to be improved to County standards.

f)	Be served by a landfill with sufficient pe project's solid waste disposal needs?	rmitte	d capacity to accommodate the
	Potentially Significant Impact Potentially Significant Unless Mitigation Incorporated		Less than Significant Impact No Impact

Discussion/Explanation:

Less Than Significant Impact: Implementation of the project will generate solid waste. All solid waste facilities, including landfills require solid waste facility permits to operate. In San Diego County, the County Department of Environmental Health, Local Enforcement Agency issues solid waste facility permits with concurrence from the California Integrated Waste Management Board (CIWMB) under the authority of the Public Resources Code (Sections 44001-44018) and California Code of Regulations Title 27, Division 2, Subdivision 1, Chapter 4 (Section 21440et seq.). There are five, permitted active landfills in San Diego County with remaining capacity. Therefore, there is sufficient existing permitted solid waste capacity to accommodate the project's solid waste disposal needs.

a) Does the project have the potential to degrade the quality of the environment, substantially reduce the habitat of a fish or wildlife species, cause a fish or wildlife population to drop below self-sustaining levels, threaten to eliminate a plant or animal community, substantially reduce the number or restrict the range of a rare or endangered plant or animal or eliminate important examples of the major periods of California history or prehistory?			
	Potentially Significant Impact Potentially Significant Unless Mitigation Incorporated		Less than Significant Impact No Impact
Discuss	sion/Evalanation:		

Discussion/Explanation:

Per the instructions for evaluating environmental impacts in this Initial Study, the potential to degrade the quality of the environment, substantially reduce the habitat of a fish or wildlife species, cause a fish or wildlife population to drop below self-sustaining levels, threaten to eliminate a plant or animal community, reduce the number or restrict the range of a rare or endangered plant or animal or eliminate important examples of the major periods of California history or prehistory were considered in the response to each question in sections IV and V of this form. In addition to project specific impacts, this evaluation considered the projects potential for significant cumulative effects. There is no substantial evidence that there are biological or cultural resources that are affected or associated with this project. Therefore, this project has been determined not to meet this Mandatory Finding of Significance.

Brayton Way	TPM 20918	

Per the instructions for evaluating environmental impacts in this Initial Study, the potential for adverse cumulative effects were considered in the response to each question in sections I through XVI of this form. In addition to project specific impacts, this evaluation considered the projects potential for incremental effects that are cumulatively considerable. As a result of this evaluation, there were determined to be potentially significant cumulative effects related to traffic. However, mitigation has been included that clearly reduces these cumulative effects to a level below significance. This mitigation includes the Transportation Impact Fee (TIF). As a result of this

evaluation, there is no substantial evidence that, after mitigation, there are cumulative effects associated with this project. Therefore, this project has been determined not to meet this Mandatory Finding of Significance.

c)	Does the project have environmental effects, which will cause substantial adverse effects on human beings, either directly or indirectly?				
□	Potentially Significant Impact Potentially Significant Unless Mitigation Incorporated		Less than Significant Impact No Impact		

Discussion/Explanation:

In the evaluation of environmental impacts in this Initial Study, the potential for adverse direct or indirect impacts to human beings were considered in the response to certain questions in sections I. Aesthetics, III. Air Quality, VI. Geology and Soils, VII. Hazards and Hazardous Materials, VIII Hydrology and Water Quality XI. Noise, XII. Population and Housing, and XV. Transportation and Traffic. As a result of this evaluation, there were determined to be potentially significant effects to human beings related to the following: Noise and Traffic. However, mitigation has been included that clearly reduces these effects to a level below significance. This mitigation includes payment of the Transportation Impact Fee (TIF) and a Noise Protection Easement over lots 1, 2 and 3 as well as sound well along Chase Avenue (ranging between 1-12 feet in height located along the southern property line that continues with a slight bend ending along the eastern property line). As a result of this evaluation, there is no substantial evidence that, after mitigation, there are adverse effects to human beings associated with this project. Therefore, this project has been determined not to meet this Mandatory Finding of Significance.
